

## Weddings

Your Big Day is important and we are able to give you the personal attention that is needed to make it a day to remember! We will meet with you weeks before the function to plan the decorations and get an idea of the style and colours you are looking for. On the day itself we will prepare, deliver and arrange the decorations personally!

We have good working relationships with all the major hotels and restaurants - many of whom regularly use Balloons for all Occasions to decorate their own functions and parties.

What we can offer

Table decorations (usually sets of 3)

These are attractively set over a weighted box and decorated individually with ribbon. As well as on the main tables, they can be placed on a buffet table or even on the cake table.

Floor decorations

Prepared similarly to table decorations, floor decorations usually have at least 5 balloons and are often used either side of the top table, or at the entrance door to the main room at the reception

Both floor and table balloon bouquets can be either latex or foil or a combination to fit your particular colour and theme.

Balloon Arches

Arches are always popular and can be used behind the top table, over the cake table or at an entrance point.

Balloon Exploder

An enormous 3ft balloon filled with confetti and 70 miniballoons, which when burst will shower the area with confetti and balloons. Often used to mark the first dance of the bride and groom and set the party off with in style!
